The water to be exchanged hereunder shall be used as a domestic water source supply for single and multifamily residential developments to be located in the Emigration Canyon area of Salt Lake County, the Kimball's Junction, Snyderville and Park City areas of Summit County, State of Utah. The water will be collected from any one or a combination of the various points of diversion and sources described herein, and treated as necessary and/or required in order to meet Board of Health standards. The water will be convey ed to the various places of use in pipelines ranging in size from 12 to 24" in diameter with appropriate pump stations as required along the pipeline system. The pipeline is to be integrated into the existing pipeline distribution system of Summit Water Distribution Company and will ultimately become a part of Summit Water Distribution Co. for management and distribution purposes. Applicants will exchange their stored water in East Canyon Reservoir for a corresponding quantity of water to be diverted from the various sources identfied herein and from the various identified points of diversion. The releases from East Canyon Reservoir will satisfy the replacement requirement under Sec. 73-3-20, U.C.A. 1953. The return flow from the domestic use will be through the Snyderville Basin Sewer Improvement district's treatment plant with the point of discharge to East Canyon Creek above East Canyon Reservoir. The return will be recaptured in the reservoir and available for use. The downstream water users will therefore have available to them more water than they have ever historically had available to them,. No one will be impaired by virtue of this exchange and applicants will not unlawfully expand their water right.
